Assumptions Regarding Focus 27

It appears that entities leaving or entering physical human embodiment pass through 27.

Much of 27 contains environments very similar to earth in structure, texture, taste, etc., including earth vegetation and animal life forms.

When those who have participated in a physical earth human experience enter 27, they are able to create familiar surroundings.

Some entities stay in 27 for long periods of time; others don't. There appear to be many "helpers" in 27, who may be based there on a long-term assignment.

There seem to be at least a few discrete functions of the Way-Station. All of these in some way probably relate to the idea of "remembering"… who and what are we, and what we're doing. These functions could be identified by labels like healing and recuperating, education and training, and planning. In this sense, 27 is a developmental center.

Some areas of 27 seem to be designed for entities entering of leaving something other than an earth human embodiment. It is also possible of earth humans to reclaim/recognize parts of the I-There that are not of human earth experience.

The Gathering, which Bob talked about in Far Journeys, is taking place in an energy pattern which, in Bob's system, would be considered Focus 34/35 (based on Bob's comment to Lifeline group.) This is accessible to earth humans for short periods of time, but we cannot stay there while still occupying an earth body.
